

## **PRODUCT DATA SHEET**

# Sidhya® Microsil 500S

Liquid Micro silica for Concrete

## **Description**

Sidhya® Microsil 500S is the liquid form of densified Micro silica which can be used in production of watertight and high durable concrete. Sidhya® Microsil 500S is highly recommended to be used in concrete in projects with requirements of Sustainability and environmental concerns such as exposure to chemical attack, abrasion and aggressive atmospheres. Sidhya® Microsil 500S is highly dispersing in nature and hence reacts with calcium hydroxide out of the cement hydration. The product enhances the rheology of the fresh concrete and improves the mechanical properties of hardened concrete.

### **Applications**

- High Performance concrete with high strength and durability requirements.
- Production of Self Compacting Concrete.
- Concrete exposed to chemical attacks such as industrial flooring, sewage treatment plants and foundations.
- Concrete for marine construction, dams and tunnels.
- Construction of blast furnace, troughs, bridge decks, girders and parking ramps etc.
- Used in the production of precast concrete.
- Used in the production of sprayed concrete, high strength grout and mortars.

#### **Mixing**

Sidhya® Microsil 500S should be batched along with water after the addition of cementitious materials to optimize the mixing time and yield maximum dispersion of the micro silica particles.

#### Dosage

The dosage of Sidhya® Microsil 500S should be used in between 3% to 10% by weight of binder content in the mix design. To achieve optimum results, preliminary trials should be conducted. It is always recommended to use Sidhya® Microsil 500S along with our Sidhya® Plast, Sidhya® Flow and Sidhya® Crete range of products.

Sidhya® Microsil 500S
September, 2024, Version 01

Item No. I/0033

## **Technical Specifications**

Color Grey State Liquid Form 1.37 - 1.43Specific Gravity [g/c] Reactivity Index [%] Minimum 105% **Appearance** Homogenous Dry Matter [%] 47.0 - 51.0Minimum 85% SiO<sub>2</sub>[%] SO<sub>3</sub>[%] ~ 0.25% CI [%] < 0.10% 0.10 - 0.70%CaO [%] Na<sub>2</sub>O [%] 0.10 - 0.60%Retained on 45 µm Sieve [%] Maximum 10% 1.0% - 6.0% Loss of Ignition [%]

**Shelf Life** 1 month from the date of production.

#### Advantages

Sidhya® Microsil 500S improves various fresh concrete properties such as cohesion due to its spherical shape and water demand. Sidhya® Microsil 500S promotes the production of Calcium Tri-Silicate Hydrate (C3SH) which reacts with free lime to improve strength, density and durability of the concrete. Following are more benefits of the product:

- Increase in early compressive strength of concrete.
- Increase in final strength of hardened concrete.
- Improvement in Rheology of Concrete.
- Reduces permeability of water and chloride penetration.
- Reduces alkali silica reaction in aggregates.
- Enhanced resistance to acid attacks.
- Increases resistance to freeze/thaw cycles.
- Increases resistance to Impact and Abrasion strength.

#### Compatibility

Sidhya® Microsil 500S is compatible with all types of cements and binders such as GGBFS, Fly ash and Metakaolin. Sidhya® Microsil 500S is also compatible with different admixtures such as water reducers, retarders, form release agents and non-chloride accelerators manufactured by Sidhya Asia Chemicals Pvt Ltd. or equivalent. We do recommend conducting preliminary trials or contacting a Sidhya® Technical Services Representative for specific information.

<sup>\*\*\*</sup>Test methods are available on request. For typical analysis of minor elements, please contact our Sidhya® Sales representative\*\*\*

## **Technical Compliances**

Sidhya® Microsil 500S conforms to the requirements of ASTM C1240 - 05 & BS EN 13263-1:2005+A1:2009

#### **Storage**

Sidhya® Microsil 500S should be stored in dry conditions and should be regularly agitated after 2 to 3 days. The materials should not be exposed to extreme heat to prevent loss of water through evaporation.

#### **Packaging**

Sidhya® Microsil 500S is available in 250 kg drums, 1300 kg IBCs and loose quantity available in Bulker. Please contact our Sales Representative for customized packing and more details

## **Legal Notice**

The recommendations related to the application and recommendations are given in good faith based on Sidhya's current experience and knowledge of the products. The benefits stated about the product are only applicable if guidelines provided by Sidhya for storing, handling and mixing are followed under normal conditions. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product is always advised to test the product's compatibility and suitability for the intended requirements and application. Sidhya reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned copies of which will be supplied on request.

## Sustainability, Health and Safety

End use of the product must read the Material Safety Data Sheet (MSDS) of the product. The MSDS provides information and advice on storage, handling and disposal of the product and instructions related to physical ecological, toxicological and other safety related data.
